<br>

```

<p style="text-align: center;">Vehicle damage estimation is used to reduce claims leakage during insurance processing.

</p>

<p style="text-align: center;">Visual inception and validation are usually done. As it takes a long time, because a person needs to come and inspect the damaged parts in the vehicle.

</p>

<p style="text-align: center;">Here we are trying to automate the procedure. Using this automation, we can avoid time consumption for the insurance claim procedure and can also prevent claims leakage.

</p>
